Chicago, IL 60643

We the above named individuals, being signatories of this application, hereby petition the Commissioner For Patents of the United States Patent and Trademark Office, to allow a non-provisional patent for our invention named, Castor Covers. These covers are designed to prevent serious injury to a person's foot after he or she has accidentally stubbed or stricken their toe on an uncovered castor, which is by definition a wheel or a set of wheels mounted in a swivel frame used for supporting furniture, such as; beds, chairs, tables, etc. The castor cover will also help prevent serious injury to children who might accidentally strike their heads on the uncovered castor while playing on the floor.

The castor cover is a 12 inch, when expanded, padded cover, held together by Velcro on the ends and wraps around the castors. It is 4 inches in height. A drawing is included with this application. It has a scale which is one inch is equal to two inches. The views presented in the drawings are a front view and top view.

We the named inventors, Henry J. Nickson and Jesse J. Evans, hereby claim all rights to produce, manufacture and distribute the afore-mentioned invention named Castor Covers.
